

WILO Stratos ECO

Residential High-Efficiency Circulators

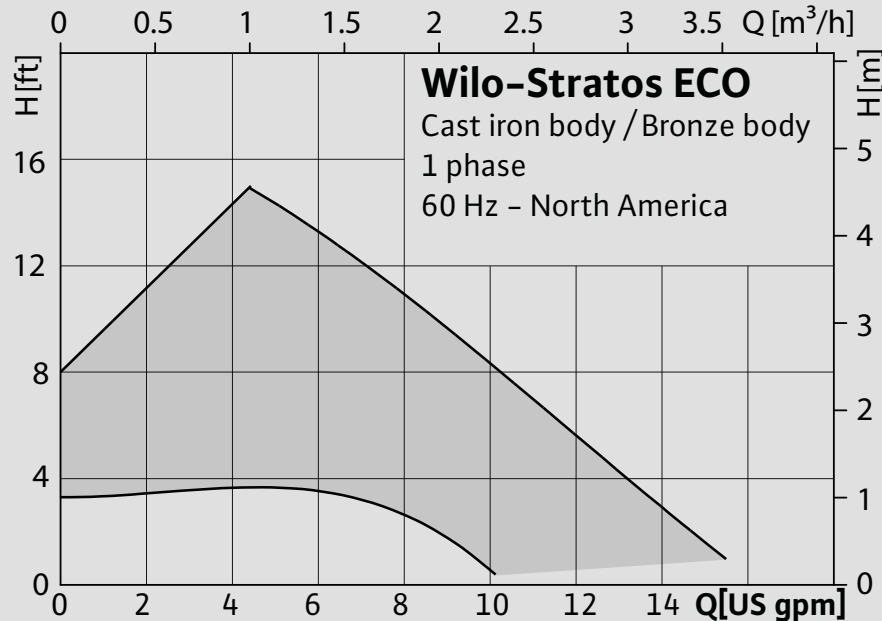

The WILO Stratos ECO is the award-winning standard for high-efficiency residential circulators. Automatically adjusting to system demands, by-pass valves, balancing, over-pumping and noisy zones are a thing of the past! Like the commercial Stratos, the ECO offers up to 80% energy savings compared to an uncontrolled circulator, consuming only 5.8 to 59 watts. Replacing up to twelve competitor's models, there is only one pump you need in the truck! Innovative? We call it *Pumpen Intelligenz*.

WILO Stratos-ECO

**Up to 80%
Energy Savings!***

** Compared to an uncontrolled circulator.*

Look for the UL mark of approval on all of WILO's high-efficiency circulators!

- Energy efficiency class A
- Up to 80% energy savings (compared to an uncontrolled circulator)
- ECM technology-based smart pump
- Max. wattage 59, min. wattage 5.8 (@115v)
- Automatically adjusts to system demands
- Available in cast iron or bronze
- Flows up to 16 USGPM
- Heads up to 16'
- Available in 115v and 230v
- For use in water and water/glycol applications up to 50% concentration
- Quick installation
- No more over-pumped, noisy zones
- Optional night setback on all models
- De-Blocking/Anti-seizing function
- Easy wiring quick connectors
- Easy set-up (set $\Delta p-v$ in feet of head via red button)
- Can replace 12 competitor's models - Only one pump in the truck!
- Max. temp 230°F, min. temp 60°F
- Two versions - Flanges parallel or perpendicular to the shaft
